

Kohinoor American School, Khandala visits American Library 'Dosti House'

KAS'ians had a wonderful opportunity of visiting the the American Library 'Dosti House', in Mumbai recently. There was an interactive session with Mr. Mirza an engineering student who along with his team represented India at **NASA** and currently, he & his team are working on Remotely Operated Underwater Vehicle (ROV). The students enjoyed the session. They realized that when it comes to making a change in the world, age isn't a barrier.

Minseok Kim student of KAS said "From this visit, i learned that my knowledge in science is just a small part of the science field & i still need to learn more."

Sameep Singh student of KAS says "We learned about the oceanering & the use of ROV's underwater. It was so much fun."

Saylee Singh student of KAS mentioned "The sessions was very interesting. The best part was getting to know about the two robots sophia and atlas."

KAS Adventure Tour at Jim Corbett National Park

Kohinoor American School students enjoyed a week-long stay at a campsite in the Jim Corbett National Park, Uttarakhand. They had adventure and service activities planned for them. Students enjoyed mountain biking, day treks, birding, night trails and other hosts of adventure activities.

It was great to see our students enjoy the life in the wild and complete the difficult tasks assigned to them. They have definitely learned a lot from this trip and are looking forward to the next one.
