

Kindness is Contagious!

With 'Kindness' in their hearts, 'Fitness' as their habit and 'Eco-friendliness' as their way of life, children of Kohinoor Blossoms accomplished their Project Day recently with intense zeal and zest.

The untiring efforts of the children, staff and parents culminated into an array of displays, demonstrations, skits and activities. Various activities and interactions were carried out throughout the month of March which later concluded on the Project Day.

As a part of 'Kindness', the children followed the 'Kindness Calendar' throughout the month which included age appropriate activities like give a hug, share a smile, say thank you, open the door for someone, etc. Children of Sr.KG. presented a short skit on Kindness which spoke volumes of the connect that they felt with their topic.

Children expressed their love for their environment by cleaning their classrooms and the area around them. Importance of Reduce-Reuse-Recycle was taught by waste segregation. The children pledged to **SAY NO TO PLASTIC** by discussing other eco friendly options. The highlight of this station was the 'Magical Recycle Box' where if one puts newspaper through one door, one gets a newspaper-recycled pencil from the other door.

'Fitness' enthusiasts planned different innovative games like the healthy snakes & ladders, health bingo, etc which kept the parents and children involved. The 'Fitness station' set up by the sports team was buzzing with fun activities wherein parents and children had a wonderful time exercising together.

It was very heartening to see that our parents too had enthusiastically prepared dioramas, charts, 3D projects etc using eco friendly materials.

It wouldn't be incorrect to say that the Project Day at Kohinoor Blossoms was 'By the children and for the children' with the help and support of team KB and our wonderful parents.
